The Aeronautical Journal of the Royal Aeronautical Society

INCORPORATING THE INSTITUTION OF AERONAUTICAL ENGINEERS AND THE HELICOPTER ASSOCIATION OF GREAT BRITAIN

VOLUME LXXXIX

JANUARY—DECEMBER 1985

The following is based on the indexing of the RAeS Publications Index 1897-1977, published by the Society.

ABBAS, Dr B. A. H.
Dynamic analysis of thick rotating blades with flexible roots, pp 10-16 (Jan).
Errata, pp 362 (Nov.).

AERODYNAMICS
Spurious entropy production and very accurate solutions to the Euler equations, Arthur Rizzi, pp 59-71 (Feb.).
Static and dynamic pitch stability of a blunted cone with forward facing aerodynamic spike in hypersonic flow, G. R. Hutt and R. A. East, pp 307-314 (Oct.).
Aerodynamics — the role of the computer, G. J. Hancock, pp 269-279 (Aug./Sept.).
On the effect of wing taper and sweep direction on leading edge transition, D. I. A. Poll and D. J. Paisley, pp 109-117 (March).
Investigation into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel, S. P. Fiddes, D. A. Kirby, D. S. Woodward and D. H. Peckham, pp 93-108 (March).
Computer studies of hybrid slotted working sections with minimum steady interference at subsonic speeds, D. G. Mabey and F. W. Steinle, pp 135-148 (April).
On the teaching of the principles of wing flexure-torsion flutter, G. J. Hancock, J. R. Wright and A. Simpson, pp 285-305 (Oct.).
On the effects of boundary-layer transition on a cylindrical afterbody at incidence in low-speed flow, D. I. A. Poll, pp 315-327 (Oct.).
The flow past two cylinders having different diameters, A. J. Baxendale, I. Grant and F. H. Barnes, pp 125-134 (April).
Photograph surveying of flow speed and direction adjacent to a surface, Dr R. V. Barrett, pp 1-9 (Jan.).
The prediction of separated flow using a viscous-inviscid interaction method, B. R. Williams, pp 185-197 (May).
On short-scale invisicd instabilities in flow past surface-mounted obstacles and other non-parallel motions, F. T. Smith and R. J. Bodonyi, pp 205-212 (June/July).
Upstream influence on turbulent jet flows from cruciform nozzles, W. R. Quinn and G. F. Marsters, pp 55-58 (Feb.).
The effect of freestream turbulence on pressure fluctuations in transonic flow, S. Raghunathan and R. J. W. McAdam, pp 87-92 (March).
The interaction of a wake with a turbulent boundary layer, Zhou Ming De and L. C. Squire, pp 72-81 (Feb.).
The three dimensional turbulent corner wall jet, S. I. Hogg and B. E. Launder, pp 167-171 (May).
The equations of motion for a parachute system descending through a real fluid, T. Yavuz, pp 343-348 (Nov.).
Effect of changes in physical parameters on the stability characteristics of parachutes descending through real fluids, T. Yavuz, pp 349-352 (Nov.).
Elimination of buffeting on the rear fuselage of the Hercules Tanker, D. G. Mabey, pp 339-342 (Nov.).
Notes on the structure on viscous and numerically-captured shocks, J. Pike, pp 335-338 (Nov.).
Dynamics analysis of thick rotating blades with flexible roots, Dr B. A. H. Abbas, pp 10-16 (Jan.).
Errata, p 362 (Nov.).
Modelling vortex flowfields by super-computers with super-size memory, Arthur Rizzi, pp 149-161 (April).

AEROFOILS
Spurious entropy production and very accurate solutions to the Euler equations, Arthur Rizzi, pp 59-71 (Feb.).
Test cases for the plane potential flow past multi-element aerofoils, A. Suddhoo and I. M. Hall, pp 403-414 (Dec.).

ALKHATIB, K. and McLEAN, D.
An analytical redundancy scheme for flight control systems, pp 353-361 (Nov.).

ASHILL, P. R. and SMITH, P. D.
An integral method for calculating the effects on turbulent boundary-layer development of sweep and taper, pp 43-54 (Feb.).

BARNES, F. H., BAXENDALE, A. J. and GRANT, I.
The flow past two cylinders having different diameters, pp 125-134 (April).

BARNWELL MEMORIAL LECTURE
What are we in business for? (An engineering approach to project finance), Pierre Young, pp 21-36 (Jan.).

BARRETT, Dr R. V.
Photographic surveying of flow speed and direction adjacent to a surface, pp 1-9 (Jan.).

BAXENDALE, A. J., GRANT, I. and BARNES, F. H.
The flow past two cylinders having different diameters, pp 125-134 (April).

BHATTACHARYA, A. P. and GUNARATNAM, D. J.
Effects of mixed elastic rotational edge restraints on the vibration, buckling and bending of circular plates, pp 257-262 (Aug./Sept.).

BODONYI, R. J. and SMITH, F.T.
On short-scale invisicd instabilities in flow past surface-mounted obstacles and other non-parallel motions, pp 205-212 (June/July).

BOOK REVIEWS — AUTHORS
Bulakh, B. M. Translated from the Russian by J. W. Reyn and W. J. Bannink. Nonlinear conical flow, p 328 (Oct.).
Cheo, P. K. Fiber optics: devices and systems, p 242 (June/July).
Davies, G. A. O. (Editor). Mathematical methods in engineering, p 162 (April).
Douglas, J. F. *et al*. Fluid mechanics — second edition, p 328 (Oct.).
Goodger, E. M. Principles of engineering thermodynamics — second edition, p 198 (May).
Hunter, S. C. Mechanics of continuous media — second edition, p 37 (Jan.).
Keys, C. N. Rotary-wing aerodynamics: Vol 2: Performance prediction of helicopters, p 118 (March).
Lees, W. A. Adhesives in engineering design, pp 198-199 (May).
Moran, J. An introduction to theoretical and computational aerodynamics, p 280 (Aug./Sept.).
Mooij, H. A. Criteria for low-speed longitudinal handling qualities: of transport aircraft with closed-loop flight control systems, p 415 (Dec.).
Ozisik, M. N. Heat transfer: a basic approach, p 198 (May).
O'Connor, P. D. T. Practical reliability engineering — second edition, p 328 (Oct.).
Pallett, E. H. J. Microelectronics in aircraft systems, p 364 (Nov.).
Pritchard, G. (Editor). Developments in reinforced plastics 1, p 82 (Feb.).
Rae, W. H. and Pope, A. Low-speed wind tunnel testing — second edition, p 118 (March).
Reddy, J. N. Energy and variational methods in applied mechanics: with an introduction to the finite element method, p 242 (June/July).
Schreier, S. Compressible flow, pp 162-163 (April).
Shapland, D. and Rycroft, M. Spacelab: research in earth orbit, p 37 (Jan.).
Smetana, F. O. Computer assisted analysis of aircraft performance stability and control, p 243 (June/July).
Stepniewski, W. Z. Rotary-wing aerodynamics: Vol 1: Basic theories of rotor aerodynamics (with application to helicopters), p 118 (March).
Strehlow, R. A. Combustion fundamentals, p 162 (April).

BOOK REVIEWS — TITLES
Adhesives in engineering design, W. A. Lees, pp 198-199 (May).
Combustion fundamentals, R. A. Strehlow, p 162 (April).
Compressible flow, S. Schreier, pp 162-163 (April).
Computer assisted analysis of aircraft performance stability and control, F. O. Smetana, p 243 (June/July).
Criteria for low-speed longitudinal handling qualities: of transport aircraft with closed-loop flight control systems, H. A. Mooij, p 415 (Dec.).
Developments in reinforced plastics 1, G. Pritchard (Editor), p 82 (Feb.).
Energy and variational methods in applied mechanics: with an introduction to the finite element method, J. N. Reddy, p 242 (June/July).
Fiber optics: devices and systems, P. K. Cheo, p 242 (June/July).
Fluid mechanics — second edition, J. F. Douglas *et al*, p 328 (Oct.).
Heat transfer: a basic approach, M. N. Ozisik, p 198 (May).
An introduction to theoretical and computational aerodynamics, J. Moran, p 280 (Aug./Sept.).
Low-speed wind tunnel testing — second edition, W. H. Rae and A. Pope, p 118 (March).
Mathematical methods in engineering, G. A. O. Davies (Editor), p 162 (April).
Mechanics of continuous media — second edition, S. C. Hunter, p 37 (Jan.).
Microelectronics in aircraft systems, E. H. J. Pallett, p 364 (Nov.).
Nonlinear conical flow, B. M. Bulakh. Translated from the Russian by J. W. Reyn and W. J. Bannink, p 328 (Oct.).
Practical reliability engineering — second edition, P. D. T. O'Connor, p 328 (Oct.).
Principles of engineering thermodynamics — second edition, p 198 (May).

Rotary-wing aerodynamics: Vol 1: Basic theories of rotor aerodynamics (with application to helicopters); Vol 2: Performance prediction of helicopters; W. Z. Stepniewski and C. N. Keys, p 118 (March).
Spacelab: research in earth orbit, D. Shapland and M. Rycroft, p 37 (Jan.).

BOUNDARY LAYERS
On the effect of wing taper and sweep direction on leading edge transition, D. I. A. Poll and D. J. Paisley, pp 109-117 (March).
An integral method for calculating the effects on turbulent boundary-layer development of sweep and taper, P. R. Ashill and P. D. Smith, pp 43-54 (Feb.).
On the effects of boundary-layer transition on a cylindrical afterbody at incidence in low-speed flow, D. I. A. Poll, pp 315-327 (Oct.).
Upstream influence on turbulent jet flows from cruciform nozzles, W. R. Quinn and G. F. Marsters, pp 55-58 (Feb.).
The interaction of a wake with a turbulent boundary layer, Zhou Ming De and L. C. Squire, pp 72-81 (Feb.).

BRADSHAW, A. and WOODHEAD, M. A.
Time-delay compensation in active control algorithms, pp 219-225 (June/July).

BUCKLING AND INSTABILITY OF STRUCTURES
Buckling of circular cylinders due to transverse shear, axial compression and normal pressure, R. R. Meyer, pp 172-178 (May).
Discussion, pp 263 (Nov.).

CAUSON, D. M. and FORD, P. J.
Numerical solutions of the Euler equations governing axisymmetric and three-dimensional transonic flow, pp 226-241 (June/July).

CHRISTOPHER, P. A. T. and THORNE, R.
Some examples of the application of the Beecham-Titchener-Simpson (BTS) method to autonomous systems, pp 380-402 (Dec.).

COMPUTERS
Aerodynamics — the role of the computer, G. J. Hancock, p 269-279 (Aug./Sept.).
Hardware integrity, W. J. Cullyer, pp 263-268 (Aug./Sept.).
Time-delay compensation in active control algorithms, A. Bradshaw and M. A. Woodhead, pp 219-225 (June/July).
Computer studies of hybrid slotted working sections with minimum steady interference at subsonic speeds. D. G. Mabey and F. W. Steinle, pp 135-148 (April).
Modelling vortex flowfields by super-computers with super-size memory, Arthur Rizzi, pp 149-161 (April).

CONTROL SYSTEMS
Time-delay compensation in active control algorithms, A. Bradshaw and M. A. Woodhead, pp 219-225 (June/July).
An analytical redundancy scheme for flight control systems, D. McLean and K. Alkhatib, pp 353-361 (Nov.).
Design of digital flight-mode control systems for helicopters with non-linear actuators, B. Porter, pp 213-218 (June/July).

CULLYER, W. J.
Hardware integrity, pp 263-268 (Aug./Sept.).

DAS, D., GHOSH, K. and VEMPATI, M.
Hypersonic flow past non-slender wedges, cones and ogives in oscillation, pp 247-256 (Aug./Sept.).

DYNAMICS
Singular perturbation theory of longitudinal dynamic stability and response of aircraft, P. Y. Xu, pp 179-184 (May).

EAST, R. A. and HUTT, G. R.
Static and dynamic pitch stability of a blunted cone with forward facing aerodynamic spike in hypersonic flow, pp 307-314 (Oct.).

EDUCATION AND TRAINING
On the teaching of the principles of wing flexure-torsion flutter, G. J. Hancock, J. R. Wright and A. Simpson, pp 285-305 (Oct.).

ENGINES
Performance of the Wells self-rectifying air turbine, S. Raghunathan, C. P. Tan and O. O. Ombaka, pp 369-379 (Dec.).

FIDDES, S. P., KIRBY, D. A., WOODWARD, D. S. and PECKHAM, D. H.
Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel, pp 93-108 (March).

FLUID MECHANICS: FLOW
Static and dynamic pitch stability of a blunted cone with forward facing aerodynamic spike in hypersonic flow, G. R. Hutt, and R. A. East, pp 307-314 (Oct.).
Spurious entropy production and very accurate solutions to the Euler equations, Arthur Rizzi, pp 59-71 (Feb.).
The flow past two cylinders having different diameters, A. J. Baxendale, I. Grant and F. H. Barnes, pp 125-134 (April).
Photographic surveying of flow speed and direction adjacent to a surface, Dr R. V. Barrett, pp 1-9 (Jan.).
The prediction of separated flow using a viscous-inviscid interaction method, B. R. Williams, pp 185-197 (May).
On short-scale inviscid instabilities in flow past surface-mounted obstacles and other non-parallel motions, F. T. Smith and R. J. Bodonyi, pp 205-212 (June/July).
Hypersonic flow past non-slender wedges, cones and ogives in oscillation, K. Ghosh, M. Vempati and D. Das, pp 247-256 (Aug./Sept.).
Numerical solutions of the Euler equations governing axisymmetric and three-dimensional transonic flow, D. M. Causon and P. J. Ford, p 226-241 (June/July).
On the effects of boundary-layer transition on a cylindrical afterbody at incidence in low-speed flow, D. I. A. Poll, pp 315-327 (Oct.).
Modelling vortex flowfields by super-computers with super-size memory, Arthur Rizzi, pp 149-161 (April).
Effect of changes in physical parameters on the stability characteristics of parachutes descending through real fluids, T. Yavuz, pp 349-352 (Nov.).
The equations of motion for a parachute system descending through a real fluid, T. Yavuz, pp 343-348 (Nov.).
Upstream influence on turbulent jet flows from cruciform nozzles, W. R. Quinn and G. F. Marsters, pp 55-58 (Feb.).
The interaction of a wake with a turbulent boundary layer, Zhou Ming De and L. C. Squire, pp 72-81 (Feb.).
The three dimensional turbulent corner wall jet, S. I. Hogg and B. E. Launder, pp 167-171 (May).
The effect of freestream turbulence on pressure fluctuations in transonic flow, S. Raghunathan and R. J. W. McAdam, pp 87-92 (March).
Elimination of buffeting on the rear fuselage of the Hercules Tanker, D. G. Mabey, pp 339-342 (Nov.).
Notes on the structure of viscous and numerically-captured shocks, J. Pike, pp 335-338 (Nov.).

FORD, P. J. and CAUSON, D. M.
Numerical solutions of the Euler equations governing axisymmetric and three-dimensional transonic flow, pp 226-241 (June/July).

GHOSH, K., VEMPATI, M. and DAS, D.
Hypersonic flow past non-slender wedges, cones and ogives in oscillation, pp 247-256 (Aug./Sept.).

GRANT, I., BARNES, F. H. and BAXENDALE, A. J.
The flow past two cylinders having different diameters, pp 125-134 (April).

GUNARATNAM, D. J. and BHATTACHARYA, A. P.
Effects of mixed elastic rotational edge restraints on the vibration, buckling and bending of circular plates, pp 257-262 (Aug./Sept.).

HALL, I. M. and SUDDHOO, A.
Test case for the plane potential flow past multi-element aerofoils, p 403-414 (Dec.).

HANCOCK, G. J.
Aerodynamics — the role of the computer, pp 269-279 (Aug./Sept.).

HANCOCK, G. J., WRIGHT, J. R. and SIMPSON, A.
On the teaching of the principles of wing flexure-torsion flutter, pp 285-305 (Oct.).

HART, Professor Clive
Carl Meerwein's flight attempt of 1785, pp 306 (Oct.).
Erasmus Darwin's model goose, pp 17-20 (Jan.).

HISTORY OF FLIGHT
Erasmus Darwin's model goose, Professor Clive Hart, pp 17-20 (Jan.).

HOGG, S. I., and LAUNDER, B. E.
The three dimensional turbulent corner wall jet, pp 167-171 (May).

HUTT, G. R. and EAST, R. A.
Static and dynamic pitch stability of a blunted cone with forward facing aerodynamic spike in hypersonic flow, pp 307-314 (Oct.).

ICAS CONGRESS — 14th
Design of digital flight-mode control systems for helicopters with non-linear actuators, B. Porter, pp 213-218 (June/July).
Numerical solutions of the Euler equations governing axisymmetric and three-dimensional transonic flow, D. M. Causon and P. J. Ford, pp 226-241 (June/July).
Time-delay compensation in active control algorithms, Dr A. Bradshaw and Dr M. A. Woodhead, pp 219-225 (June/July).

KIRBY, D. A., WOODWARD, D. S., PECKHAM, D. H. and FIDDES, S. P.
Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel, pp 93-108 (March).

LANCHESTER MEMORIAL LECTURE
Aerodynamics — the role of the computer, G. J. Hancock, pp 269-279 (Aug./Sept.).

LAUNDER, B. E. and HOGG, S. I.
The three dimensional turbulent corner wall jet, pp 167-171 (May).

McADAM, R. J. W. and RAGHUNATHAN, S.
The effect of freestream turbulence on pressure fluctuations in transonic flow, pp 87-92 (March).

McLEAN, D. and ALKHATIB, K.
An analytical redundancy scheme for flight control systems, pp 353-361 (Nov.).

MABEY, D. G.
Elimination of buffeting on the rear fuselage of the Hercules Tanker, pp 339-342 (Nov.).

MABEY, D. G. and STEINLE, F. W.
Computer studies of hybrid slotted working sections with minimum steady interference at subsonic speeds, pp 135-148 (April).

MANAGEMENT
What are we in business for? (An engineering approach to project finance), P. H Young, pp 21-36 (Jan.).

MAN-POWERED FLIGHT
Carl Merwein's flight attempt of 1785, Clive Hart, pp 306 (Oct.).

MARSTERS, G. F. and QUINN, W. R.
Upstream influence on turbulent jet flows from cruciform nozzles, pp 55-58 (Feb.).

MATHEMATICAL MODELLING AND MATHEMATICS
Spurious entropy production and very accurate solutions to the Euler equations, Arthur Rizzi, pp 59-71 (Feb.).
Some examples of the application of the Beecham-Titchener-Simpson (BTS) Method to autonomous systems, P. A. T. Christopher and R. Thorne, pp 380-402 (Dec.).

MEYER, R. R.
Buckling of circular cylinders due to transverse shear, axial compression and normal pressure, pp 172-178 (May).
Discussion, pp 263 (Nov.).

NOZZLES
Upstream influence on turbulent jet flows from cruciform nozzles, W. R. Quinn and G. F. Marsters, pp 55-58 (Feb.).

OMBAKA, O. O., RAGHUNATHAN, S. and TAN, C. P.
Performance of the Wells self-rectifying air turbine, pp 369-379 (Dec.).

PAISLEY, D. J. and POLL, D. I. A.
On the effect of wing taper and sweep direction on leading edge transition, pp 109-117 (March).

PARACHUTES
Effect of changes in physical parameters on the stability characteristics of parachutes descending through real fluids, T. Yavuz, pp 349-352 (Nov.).
The equations of motion for a parachute system descending through a real fluid, T. Yavuz, pp 343-348 (Nov.).

PECKHAM, D. H., FIDDES, S. P., KIRBY, D. A. and WOODWARD, D. S.
Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel, pp 93-108 (March).

PHOTOGRAPHS
Boundary layers
Smoke flow photographs in the boundary layer, p 80 (Feb.).
Smoke flow photographs in the wake, p 80 (Feb.).

Engines
Flutter engine, p 293 (Oct.).

Flows
Aircraft modified with drogue box, p 339 (Nov.).
Attached flow on unmodified aircraft, p 341 (Nov.).
Bleed hole configuration, p 340 (Nov.).
Final configuration with outer and inner strakes plus bleed holes (not visible), p 340 (Nov.).
Separated flow with drogue box, p 341 (Nov.).
Separated flow with drogue box and outer strakes, p 342 (Nov.).
Separated flow with drogue box, outer and inner strakes and base bleed, p 342 (Nov.).
Schlieren flow visualisation of the blunted cone with aerodynamic spike, L_{sp} = 3 mm, p 311 (Oct.).
Schlieren flow visualisation of the blunted cone with aerodynamic spike, L_{sp} = 5 mm, p 311 (Oct.).
Schlieren flow visualisation of the blunted cone with aerodynamic spike, L_{sp} = 8 mm, p 312 (Oct.).

Miscellaneous
F. W. Lanchester, p 269 Aug./Sept.).

Wind Tunnels
Hawk model in 5 metre tunnel, p 93 (March).
A300 model in 5 metre tunnel, p 96 (March).
RAE model 477, p 98 (March).
RAE model 485, p 99 (March).

Wings
View of cylindrical probe combining yaw and base pressure tappings in position on wing, p 2 (Jan.).

PIKE, J.
Notes on the structure of viscous and numerically-captured shocks, pp 335-338 (Nov.).

POLL, D. I. A.
On the effects of boundary-layer transition on a cylindrical afterbody at incidence in low-speed flow, pp 315-327 (Oct.).

POLL, D. I. A. and PAISLEY, D. J.
On the effect of wing taper and sweep direction on leading edge transition, pp 109-117 (March).

PORTER, B.
Design of digital flight-mode control systems for helicopters with non-linear actuators, pp 213-218 June/July).

QUINN, W. R. and MARSTERS, G. F.
Upstream influence on turbulent jet flows from cruciform nozzles, pp 55-58 (Feb.).

RAGHUNATHAN, S. and McADAM, R. J. W.
The effect of freestream turbulence on pressure fluctuations in transonic flow, pp 87-92 (March).

RAGHUNATHAN, S., TAN, C. P. and OMBAKA, O. O.
Performance of the Wells self-rectifying air turbine, pp 369-379 (Dec.).

RIZZI, Arthur
Modelling vortex flowfields by super-computers with super-size memory, pp 149-161 (April).
Spurious entropy production and very accurate solutions to the Euler equations, pp 59-71 (Feb.).

ROTORCRAFT
Design of digital flight-mode control systems for helicopters with non-linear actuators, B. Porter, pp 213-218 (June/July).
Dynamic analysis of thick rotating blades with flexible roots, Dr B. A. H. Abbas, pp 10-16 (Jan.).
Errata, p 362 (Nov.).

SIMPSON, A., HANCOCK, G. J. and WRIGHT, J. R.
On the teaching of the principles of wing flexure-torsion flutter, pp 285-305 (Oct.).

SMITH, F. T. and BODONYI, R. J.
On short-scale inviscid instabilities in flow past surface-mounted obstacles and other non-parallel motions, pp 205-212 (June/July).

SMITH, P. D. and ASHILL, P. R.
An integral method for calculating the effects on turbulent boundary-layer development of sweep and taper, pp 43-54, (Feb.).

SQUIRE, L. C. and ZHOU, Ming De
The interaction of a wake with a turbulent boundary layer, pp 72-81 (Feb.).

STEINLE, F. W. and MABEY, D. G.
Computer studies of hybrid slotted working sections with minimum steady interference at subsonic speeds, pp 135-148 (April).

STRUCTURES AND STRUCTURAL DESIGN
Notes on the structure of viscous and numerically-captured shocks, J. Pike, pp 335-338 (Nov.).

SUDDHOO, A. and HALL, I. M.
Test cases for the plane potential flow past multi-element aerofoils, pp 403-414 (Dec.).

TAN, C. P., OMBAKA, O. O. and RAGHUNATHAN, S.
Performance of the Wells self-rectifying air turbine, pp 369-379 (Dec.).

THORNE, R. and CHRISTOPHER, P. A. T.
Some examples of the application of the Beecham-Titchener-Simpson (BTS) method to autonomous systems, pp 380-402 (Dec.).

TURBULENCE
The effect of freestream turbulence on pressure fluctuations in transonic flow, S. Raghunathan and R. J. W. McAdam, pp 87-92 (March).
Upstream influence on turbulent jet flows from cruciform nozzles, W. R. Quinn and G. F. Marsters, pp 55-58 (Feb.).
The interaction of a wake with a turbulent boundary layer, Zhou Ming De and L. C. Squire, pp 72-81 (Feb.).
The three-dimensional turbulent corner wall jet, S. I. Hogg and B. E. Launder, pp 167-171 (May).
Elimination of buffeting on the rear fuselage of the Hercules Tanker, D. G. Mabey, pp 339-342 (Nov.).

VEMPATI, M., DAS, D. and GHOSH, K.
Hypersonic flow past non-slender wedges, cones and ogives in oscillation, pp 247-256 Aug./Sept.).

VIBRATION
Effects of mixed elastic rotational edge restraints on the vibration, buckling and bending of circular plates, D. J. Gunaratnam and A. P. Bhattacharya, pp 257-262 (Aug./Sept.).

VORTICES
Modelling vortex flowfields by super-computers with super-size memory, Arthur Rizzi, pp 149-161 (April).

WILLIAMS, B. R.
The prediction of separated flow using a viscous-inviscid interaction method, pp 185-197 (May).

WIND TUNNELS
Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel, S. P. Fiddes, D. A. Kirby, D. S. Woodward and D. H. Peckham, pp 93-108 (March).
Computer studies of hybrid slotted working sections with minimum steady interference at subsonic speeds, D. G. Mabey and F. W. Steinle, pp 135-148 (April).

WINGS
On the effect of wing taper and sweep direction on leading edge transition, D. I. A. Poll and D. J. Paisley, pp 109-117 (March).
On the teaching of the principles of wing flexure-torsion flutter, G. J. Hancock, J. R. Wright and A. Simpson, pp 285-305 (Oct.).

WOODHEAD, M. A. and BRADSHAW, A.
Time-delay compensation in active control algorithms, pp 219-225 June/July).

WOODWARD, D. S., PECKHAM, D. H., RIDDES, S. P. and KIRBY, D. A.
Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel, pp 93-108 (March).

WRIGHT, J. R., SIMPSON, A. and HANCOCK, G. J.
On the teaching of the principles of wing flexure-torsion flutter, pp 285-305 (Oct.).

XU, P. Y.
Singular perturbation theory of longitudinal dynamic stability and response of aircraft, pp 179-184 (May).

YAVUZ, T.
Effect of changes in physical parameters on the stability characteristics of parachutes descending through real fluids, pp 349-352 (Nov.).
The equations of motion for a parachute system descending through a real fluid, pp 343-348 (Nov.).

YOUNG, P. H.
What are we in business for? (An engineering approach to project finance), pp 21-36 (Jan.).

ZHOU, Ming De and SOURE, L. C.
The interaction of a wake with a turbulent boundary layer, pp 72-81 (Feb.).
